

A CLEAR DECISION FOR EVERY ORDER

Before you promise, see the whole picture.

Can you deliver, protect your margin and keep enough cash? Know what to make or buy before you commit.

Works alongside **Tally, Excel and your ERP**, using orders from WhatsApp, email, calls and portals.

PRIVATE BUSINESS INTELLIGENCE

Your business data. Under your control.

No unrestricted sharing with generic AI tools.

Agree what AI can access and where it runs before connecting your data.

Company-owned context

Controlled AI access

WHAT YOU GET

One operating view

Orders, delivery commitments and exceptions.

Order-wise recommendations

Actions, suppliers, delivery, margin and cash.

A weekly strategic brief

The market and policy signals relevant to you.

Three ways your business benefits

Promise with confidence

Check stock, production and supply before agreeing delivery dates.

Protect margin and cash

Compare the trade-offs before choosing how to fulfil an order.

Win back strategic time

Track your chosen metrics and act on exceptions instead of chasing updates.

Start with one workflow in one week.

A focused pilot, with agreed scope and data access ready.

DAYS 1-2

Choose & connect

Pick one decision. Share a real order and existing exports or supported connections.

DAYS 3-4

Set your rules

Define the metrics, check first results together and flag missing facts.

DAYS 5-7

Start using your first view

Review your dashboard and order recommendations with your team.

Built around how you run the business.

Your rules. Repeatable calculations.

Owner-defined checks compare each option on the same basis.

Your business, with an outside view.

A weekly brief curated by industry leaders adds market context.

AI works within your rules.

Decide what AI can access, for which task and in which environment.

Your intelligence. Your rules. Your growth.
